Experience

Software Developer

Jun 2025 - Present

Indiana University Bloomington

USA

- Developed a full-stack campus event discovery app that helped 40,000+ students find nearby events with a map-and-details integrated UI.
- Designed and scaled RESTful APIs and data models; added caching and request de-duplication to cut API calls by 60%.
- Conducted A/B UI testing with a designer on navigation and card layouts to reduce event-finding fatigue; improved engagement by 20%.

Machine Learning Engineer

Jan 2023 - Aug 2023

Pune Institute of Computer Technology

Pune, India

- Trained a Convolutional Neural Network for weather condition classification, achieving 88% accuracy by processing over 5,000 weather images.
- Collaborated with research teams to optimize a VGG16 CNN model through hyperparameter tuning and cross-validation, improving system reliability by 15%.
- Facilitated communication across teams to improve collaboration and knowledge sharing.

Web Developer Intern

Jan 2022 - Sep 2022

FinQuest

India

- Built a responsive React.js UI for a news platform publishing 50+ articles/day; increased average user retention time by 18%.
- Improved performance via lazy-loaded images, asset compression, and browser caching; reduced page render time by 20%; added unit/integration tests (Jest) and CI/CD checks.
- Integrated REST APIs with pagination, client-side caching, and robust error handling; reduced redundant API requests and improved page render time.

Technical Skills

Programming Languages: Python, C++, JavaScript, TypeScript

Frameworks: React.js, Node.js, Express.js, Django, Rest API

AI & Machine Learning: LangChain, TensorFlow, Pytorch

Platform & Infrastructure: GitHub Actions (CI/CD), Distributed Systems, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Cassandra

Cloud & DevOps: Docker, AWS, Kubernetes

Projects

SportConnect | MERN Stack, Docker, CI/CD

- Architected a full-stack social platform (MERN, TypeScript) with secure auth, posts, and real-time chat (Socket.IO); containerized services with Docker and set up CI/CD (GitHub Actions) with automated testing for reliable releases.
- Accelerated performance and scalability by implementing API pagination, MongoDB indexing, and Redis caching; reduced p95 feed load time by 60% and improved reliability with structured logging, monitoring, and robust error handling.

BrainstormAI | Node.js, LangChain.js, LangGraph, RESTful APIs

- Engineered a brainstorming AI system to foster candid, creative ideation and reduce pandering, surpassing basic chat tools.
- Developed a stateful LangGraph workflow with dynamic tool selection, self-critique, memory, and structured outputs for coherent multi-session reasoning.

Education

Indiana University Bloomington

Aug 2023 - May 2025

Master of Science in Computer Science, GPA: 3.6/4

Bloomington, IN

Pune Institute of Computer Technology

Aug 2019 - May 2023

Bachelor's in Computer Engineering, Minors in CyberSecurity, GPA: 8.88/10

India
