EDUCATION

Indiana University Bloomington

MS in Computer Science

Bloomington, IN

Aug 2023 - May 2025

Pune Institute of Computer Technology

Bachelor's in Computer Engineering, Minors in CyberSecurity

Pune, India

Aug 2019 - May 2023

EXPERIENCE

Research Assistant Internship

Pune Institute of Computer Technology

Feb 2022 - May 2022

Pune, India

- Trained a Convolutional Neural Network for weather condition classification, **achieving 88%** accuracy by processing over 5,000 weather images, contributing key findings that improved project outcomes by 30%.

Web Developer Intern

Finquest (Indian Economics Updates)

Jun 2021- Sep 2021

Pune, India

- Designed the front-end of a website showcasing over 50 news articles daily, **increasing the number of website visitors by 22%** through a user-friendly interface.
- Experimented with Bootstrap to produce an eye-catching grid display of articles using the ReactJs Framework

PROJECTS

SportConnect 🗣️ | *MERN Stack, Docker, CI/CD pipelines, OAuth*

Mar 2024 – Jun 2024

- Architected a **full-stack MERN social application** enabling users to connect based on shared sports interests, featuring profiles, posts, comments, and real-time chat capabilities.
- Integrated secure user authentication using JWT (bcrypt hashing) and Google/Facebook OAuth, alongside features like password reset (nodemailer) and reCAPTCHA.
- Forged backend **RESTful APIs** using Express.js and Mongoose which processed 300+ user requests per minute, enabling core functionalities for social networking mobile application.

EventCraft 🗣️ | *Python, Case-Based Reasoning, Tkinter, Pandas*

Mar 2024 – Jun 2024

- Engineered a Case-Based Reasoning (CBR) system for IMU Catering, automating logistical planning for 15+ monthly events, **reducing planning time by 35%** through adaptation of historical data.
- Constructed three comprehensive knowledge bases (CSVs) using pandas DataFrames, enabling efficient case retrieval and solution adaptation within the CBR framework.
- Created an intuitive Tkinter GUI for event parameter input, interfacing with the CBR engine to generate tailored plans and improve user experience.

BloomingtonBuzz 🗣️ | *SwiftUI, CoreLocation, MapKit, MVVM*

Feb 2024 – May 2024

- Built BloomingtonBuzz, an iOS event discovery app for Indiana University using SwiftUI, developing 5 key features including an interactive map (MapKit) and personalized recommendations (CoreLocation) within a 3-month timeline, and **conducting user testing with 20+ peers** that provided feedback to enhance user experience.
- Built using modern iOS practices (MVVM, Swift Package Manager) and ensured proper location authorization/privacy.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL

Databases: MongoDB, MySQL, Elasticsearch, DynamoDB, SimpleDB, Cassandra, Redis

Platforms & Tools: Git, GitHub, Docker, CI/CD, AWS EC2, Flink, Spark, Kafka

AWARDS & ACHIEVEMENTS

PICT Hackathon 2022 Runner Up - Developed a Home Security Device using old smartphones, recognized for innovation among 50+ participants.

MERN Stack Talk - Led comprehensive MERN stack web development training to 50+ participants and created hands-on projects, resulting in 30 attendees contributing to the team's open-source projects.

Machine Learning Paper Published - Sentiment Analysis
